

Thursday 4/10

Welcome! 👤

Announcements:

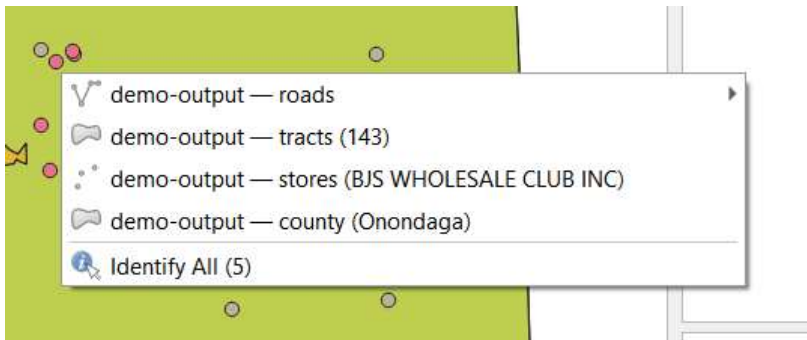

- Two corrections to g28:
See printed copies or Slack corrections channel
- Assignments **g27, g28** are posted and due on **Friday**
- Repository information (Google Classroom) due on **Friday**
- Repositories g29-g32 are posted but are **examples**, not assignments

Tips:

- Using the QGIS information tool with multiple layers

By default, shows fields from the layer selected in the layer list

Right click to choose from list of layers:

To change default behavior, use the Mode selector in the identify dialog:

Identify Results
